ICU Data Systems, A V2R Group Portfolio Company, Expands Product Distribution Via National Strategic Relationship with Faveo Medical Solutions

ORLANDO, FL (MAY 14, 2007) – V2R Group, Inc., a leading high-technology commercialization & management company, announced today that its portfolio company ICU Data Systems has formed a marketing partnership with Faveo Medical Solutions. ICU Data Systems is a provider of critical care medical technology solutions and the new strategic relationship with Faveo Medical Solutions will greatly expand the representation and distribution of ICU Data Systems products and technologies nationwide.

Bahram Yusefzadeh, V2R Group Chairman said, “Our success in expanding our strategic alliances with companies such as Faveo Medical Solutions has vast possibilities for increased exposure and credibility in the hospital marketplace. Sandra Jungers and her team have solid relationships in the medical community and one of the company’s areas of expertise is Neonatology, which is also a rapidly expanding area of expertise for ICU Data Systems. We believe that our relationship with Faveo Medical Solutions will be an important step in helping ICU Data Systems align with the spheres of influence within the critical care sectors of the medical field.”

Lori Frank, CEO of ICU Data Systems added, “We are excited to announce our strategic relationship with the Faveo Medical Solutions team and CEO Sandra Jungers, a highly respected and well-known clinical consultant. By aligning ourselves with the team of experts at Faveo, we are immediately positioned to significantly broaden our presence in clinical settings and Intensive Care Units. The first product that will be represented via this relationship is ICU Data System’s flagship product, *iCuro*[™] (**ICU Real-time Observer**), which provides real-time, cost-effective ICU patient data management solutions with a single point, clinical integrated system.”

Sandra Jungers, CEO of Faveo Medical Solutions commented, “The formation of a marketing alliance with ICU Data Systems is an ideal match because our company has relationships with hospitals, physicians, nurses, and other caregivers nationwide who are actively seeking technological advances to provide better patient care. We believe *iCuro* provides an important and exciting technological development for clinical settings and Intensive Care Units. The *iCuro* technology allows hospitals to gather and analyze patient data minute-by-minute, versus relying on manual recordings from a paper flowsheet, which are often only charted hourly. *iCuro* simultaneously displays and stores data from virtually all of the bedside equipment and monitors, giving medical teams critical patient information that is not available via routine bedside charting.”

About V2R Group, Inc.

V2R Group is a leading company focused on the commercialization and management of highly innovative technologies. A key element of the V2R business model is to partner with universities to facilitate the transfer and commercialization of revolutionary technologies, with a focus on mid-stage high-tech businesses that have been developed past the initial research and development stage. V2R is led by a management team with many years of experience in technology commercialization and business. For more information, visit www.v2r.com

About ICU Data Systems

ICU Data Systems, a portfolio company of V2R Group, Inc., is a provider of critical care medical technology solutions, with offices in Orlando and Gainesville, Florida, and Minneapolis, Minnesota. The company's flagship product, iCuro™ is a unique, automated real-time bedside clinical data management solution for bedside clinicians in intensive care units. This cost-effective data solution supersedes the hourly manual charting methods used today, by capturing and centralizing patient data in real time from multiple clinical data sources. Utilizing its proprietary and patented technology, ICU Data Systems also enables the intensive care units of hospitals to easily comply with JCAHO standards and HIPAA mandates. iCuro is both FDA-cleared and UL-certified. About Faveo Medical Solutions

The Faveo Medical Solutions team specializes in marketing technologies and products to the medical community and is headquartered in Peachtree City, GA. Prior to founding the company, CEO Sandra Jungers, R.N. spent the last 15 years as a clinical consultant and educator in the specialty medical distribution arena, primarily focused in the critical care areas of acute care facilities, along with various new technology marketing roles in her consulting capacity. Prior to this, she spent 15 years in the clinical setting working as a clinical bedside nurse, serving in management roles, and four of those years in nursing education.

###

iCuro™ was developed by a team of scientists at The University of Florida Colleges of Medicine & Engineering. Portions of the funding for the initial research and development were provided by National Medical Technology Testbed (NMTB), an organization funded by the Department of the Army under Cooperative Agreement DAMD17-97-2-7016.
